Projects

Maildog (Ruby on Rails, Backbone.js)   Live • Github

A near-faithful clone of Gmail
➢ Comprehensive unit and integration tests using RSpec and Capybara.
➢ Custom authentication using BCrypt overrides User#password= method to store secret hash instead of plain text.
➢ Quick navigation achieved by utilizing custom collection and member routes.

Snake (Javascript, CSS)   Live • Github

Browser version of the classic mobile game Snake
➢ Interactive UI achieved through a combination of JQuery and CSS.
➢ Dynamically updates score and games played counts.

Chess (Ruby)   Github

A console-based two-player chess game
➢ Comprehensive RSpec unit tests.
➢ Multi-level class inheritance DRYs up code.
➢ Supports keyboard input via io/console extension of Ruby's built-in IO class.

Skills

Ruby	Ruby on Rails	JavaScript	SQL	jQuery
Backbone.js	Git	HTML	CSS	RSpec

Education

App Academy   2015
